

For health systems, eConsults enable more efficient care: ensuring the right setting, right provider, at the right time for all patients.

eConsults deliver higher patient satisfaction and retention, improved network management, and more efficient care.

CAHPS scores

HEDIS metrics

Results you can quantify

eConsults can:

Increase patient satisfaction and retention

Receive immediate treatment from the PCP in >70% of cases

Avoid unnecessary specialist visits to reduce out-of-pocket expenses, time off work, travel, child care, and co-pays

Improve network management and reduce leakage

Capture all potential referrals through eConsult, directing them to same network provider when face-to-face is required

Relationship building between PCPs and specialists

Increase compliance and reduce no-shows

Patients with an eConsult indicating a face-to-face visit is required are more apt to fulfill appointments and receive required workup in advance

Improve access

Reduce wait times

Fewer low-value referrals

Treat higher-value patients

Fewer low-complexity/acuity referrals

More new patient opportunities

Higher surgical/procedural yield

Implementing eConsults provides health system benefits across numerous cases.

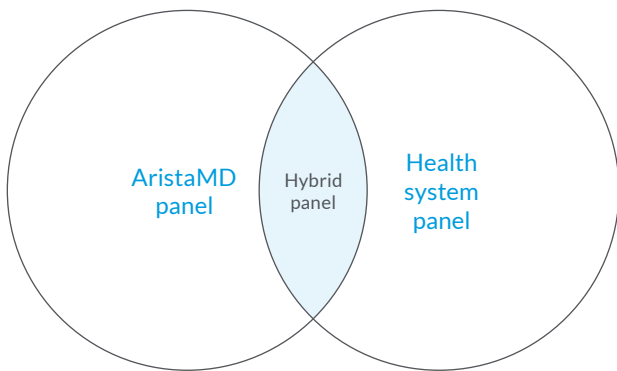

At any referring clinic: Treat more patients without a referral, ensure PCPs and specialists are operating at top of license, increase patient satisfaction, and reduce network leakage.

Federally Qualified Health Centers (FQHCs): eConsults allow more cost-effective management of lower-acuity and lower-reimbursing patients.

Geographically remote clinics: eConsults act as a gateway into the system, enabling community hospitals and others across your state, or even country, to access your system physicians and drive referrals in person as merited.

Capitated contracts: eConsults reduce costs for your capitated contracts.

Post-op follow-up: eConsults replace in-person visits to more efficiently manage post-op monitoring in certain specialties.

We offer flexible specialist panel options.

AristaMD panel: Partner with AristaMD to help your referring PCPs get access to our expansive panel of specialists.

Hybrid panel: Utilize a hybrid panel where AristaMD can be a supplement to system specialists.

Health system panel: License the AristaMD platform to enable eConsults with your specialists.

Panel management ensures quality and retention.

You have the option for us to support your specialists with our robust training and resources.

Training | Management & scheduling | Established processes for constant improvement

What AristaMD specialists have to say:

“ The AristaMD platform is very user friendly. Scheduling my availability is simple, and the platform notifies me of new consults in my queue to review. The platform also allows for a flexible method for reviewing requests and conversing with the requesting provider.

“ The AristaMD platform is seamless and very easy to use.
