

AristaMD Photo App

Add supporting photos to eConsults directly from your mobile device.

AristaMD's mobile app makes it easy and secure to submit patient photos for use in eConsults. Supporting photos help specialists give more effective recommendations and are essential for eConsults in dermatology and wound care.

The app can also be used to add photos of non-digital patient notes, imaging, and even computer screens.

KEY FEATURES:

Web-based and mobile-friendly, no app store download required

Works across all smartphone types—iPhone/iOS and Android

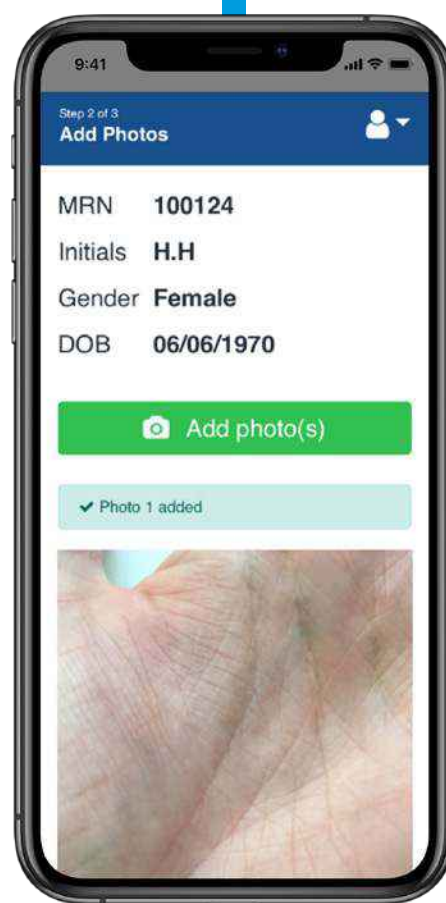

Secure & HIPAA compliant—photos are saved to AristaMD, not mobile device

Seamless device user management—sign-in using existing AristaMD credentials

Easy-to-access via home screen icon and touch/Face ID

Auditable records—photos are uploaded to EHR as part of finalized eConsults
