

Hundreds of U.S. based, board-certified specialists.

An expansive list of specialty areas, at your fingertips.

Receive care planning advice in a matter of hours from our contracted panel of specialists.

22% of our specialists are practicing at an academic institution.

64% have fellowship training.

100% are based in the U.S.

15 years is the average number of years in practice.

<4 hours majority of cases are completed in less than 4 hours, guaranteed in 24.

Panel Credentialing

We use the highest standards to recruit our specialist physicians, and all of them are credentialed according to NCQA guidelines. All specialists are active, board-certified clinicians, and many are affiliated with academic institutions.

Hiring and Training

All specialists have to pass strict background checks, and they undergo in-depth training in telehealth and eConsults. As part of our quality assurance program, PCPs evaluate their experience after each eConsult.

Process and Regulations

All specialty eConsults are official documents, signed and dated by the specialist and added to the patient EHR. Our physician panel is fully insured for eConsults.
