

# How do eConsults combat long wait times?

When patients request an appointment with a specialist, how long must they wait to be seen?

Are long patient wait times the biggest detriment to accessible patient care?

With rising appointment wait times and a decline in healthcare personnel, patients are struggling to receive specialty care.

eConsults successfully replace more than 70% specialty care visits.

On average, AristaMD specialists respond within 4-6 hours. This allows patients to receive an answer quicker than they would if they were to visit a specialist.

Together, eConsults and referral management reduce the time required to coordinate patient care and helps to eliminate long wait times for healthcare.

## Facts

**4 hours** is the average wait time for a gastroenterology eConsult response from AristaMD

**26.1 days** is the average wait time to see a gastroenterologist.
