Increase quality referrals with custom, online referral forms. PowerForms put you in control.

Specialty care practices need tools to simplify the referral process and increase efficiency. With AristaMD's PowerForms, specialists can securely receive patient referrals directly from the practice's website. PowerForms also enable the practice to:

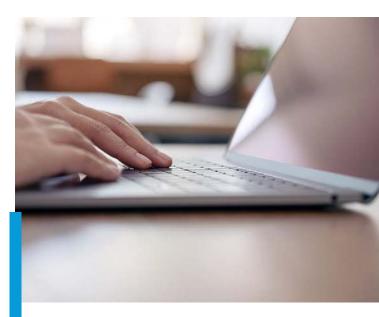

- Ask specialty-specific questions to improve patient intake and prioritize patients that require urgent diagnosis and treatment.
- Gather the patient's medical history.
- Import imaging and lab work to avoid duplicate testing.
- Verify the patient's insurance information in realtime.

When PCPs send referrals electronically, your staff saves time manually entering patient information and gathering necessary details about the patient's condition.

Referring practices also benefit from this solution. PowerForms allow primary care clinics to send a referral in 90 seconds without a fax machine —eliminating failed faxes and follow-up phone calls.

Referring clinics complete a simple 4-step process:

- 1. Enter basic patient information.
- 2. Attach relevant patient history, lab work and images.
- 3. Answer referral questions.
- 4. Send the referral

Custom questions allow you to collect patient details like:

- The patient's willingness to receive surgery.
- Whether a biopsy or other diagnostics were performed.
- Unsuccessful treatment plans.
