

Get specialist insight within 24 hours

eConsults enable your practice to offer patients timely treatment.

eConsults are an invaluable tool in any PCP practice to manage your patients and ensure they get the timely, specialist guided treatment they need. More than 70% of routine clinical referrals, with the guidance of virtual specialists.

AristaMD understands the challenges you and your patients face to get access to specialist care.

Providers

For providers, it can be lack of specialty care resources for patients, lack of guidance for specialty related workups, or availability of timely specialty guidance for remote providers.

Patients

For patients, challenges include: lack of transportation, child or elder care, or understanding importance of specialty care for their condition.

The AristaMD eConsult platform provides:

Replacement of unnecessary specialist visits, allowing PCPs more patient care oversight

Interim care planning advice while patients wait to be seen by a specialist

Non-emergent EKG review

Validation of treatment plan

Validation of need to refer the patient

Treatment questions or medication regimen confirmation

Specialized recommended workups for specific conditions

For more information or to request a demo, contact us at info@aristamd.com or visit us at www.aristamd.com.

How eConsults benefit your practice

By using eConsults, you can retain **>70%** of cases in your office that would have been referred.

Optimized clinical capabilities at your clinic—informed by our on-call network of specialists

Interim care planning advice, diagnostics and workup guidance

Improved patient satisfaction — better, faster, and more affordable access to the care they need

Increased clinical skills and knowledge about specialty best practices, treatments and specialty-related workups

Increased patient retention - reduce unnecessary leakage by expanding the scope of care at the practice and reducing the number of outside referrals

Adopting eConsults

Adopting eConsults is simple and requires almost no time to submit cases. No EMR integration required, goes live in a matter of days.

You have control. PCPs determine the patient's care plan following specialist eConsult recommendations

It's proven. >70% of our eConsults replace a specialist office visit and >90% positively impact the patient care plan.

“ Once embraced, eConsults become a tool for primary care providers of all types to help them fully realize the scope of their practice, becoming ‘Super PCPs.’
